Please Join Us! 2024 CVMA Continuing Education

CARDIOLOGY
March 6, 2024
With Sonya Gordon, DVM, DVSc, Diplomat
ACVIM

Dr. Gordon will discuss a practical roadmap for canine myxomatous valve disease and Feline Cardiomyopathy: how to find it, stage it and treat it. The first session will use a variety of cases to explore cost-effective stage specific management strategies. CM session will emphasize recommendations for screening, diagnosis and staging and treatment of CM. Attendees will gain confidence and learn how to incorporate recommendations into their practice.

ANESTHESIOLOGY May 15, 2024 With Jeff Ko, DVM, MS, DACVA

Revolutionizing Anesthesia Monitoring: Uncover

the Power of EEG and HRV for Enhanced Patient Care: In this engaging lecture, you'll gain valuable insights on harnessing the power of EEG. Discover how to incorporate EEG monitoring to accurately assess anesthetic depth, detect individual sensitivity and ensure the safe administration of anesthesia in pediatric and geriatric patients whose brains age differently.

SURGERY
June 12, 2024
With Howard B. Seim III, DVM, DACVS

Lectures will consist of a variety of practical soft tissue surgery techniques that most veterinarians can perform in their practice. Video segments of clinical case material will be used as a means of delivering surgical lectures. An advantage of this lecture style is that participants are able to see the case actually operated on during the lecture. Topics will consist of respiratory, gastrointestinal and urinary surgery cases.

CLINICAL PATHOLOGY
September 11, 2024
With Kate Baker, DVM, MS, DACVP

Dr. Kate Baker will be discussing various topics in cytology. This session will include tips for sample collection and preparation, the use of the cytologic algorithm for cytologic interpretation, the cytologic features of round cell tumors, common skin mass cytologies, fluid analysis, and practical applications of cytology through real-life case studies. These sessions aim to provide a comprehensive yet practical understanding of cytology in veterinary medicine, covering techniques, interpretation methods, and diagnostic considerations.

EXOTIC COMPANION ANIMALS & AVIAN CRITICAL CASES
September 19, 2024

With Lily Parkinson, DVM, Dipl. ACZM, Dip. ACVECC

Dr. Lily Parkinson will be discussing approaches to common exotic companion animal presentations. She will cover unusual diagnoses in exotic companion mammals, but the typical diagnostic algorithm utilized for each case will be detailed and common differential diagnoses will be discussed for multiple exotic companion mammals. Also discussed will be emergency triage and management in avian patients.

BEHAVIOR October 9, 2024 With Niwako Ogata, BVSc, PhD, DACVB

Dr. Ogata will focus on the crucial areas of prevention, screening, and practical management/treatment. Gain profound insights into behavior development in puppies and kittens, while also delving into the complexities of inter-dog and inter-cat aggression within the same household. Enhance your understanding of psychopharmacology and its implications in behavior-related issues, and critically analyze prevalent myths surrounding behavior problems and management methodologies.

THERIO/REPRODUCTION
December 11, 2024
With Marty Greer, DVM, JD

Dr. Greer will take a long look into canine reproduction. Hormones: cycle, level measurement, which hormone to measure and which instruments to use. She'll also take an in-depth look at the whelping process and neonatal care including causes of puppy loss, passive immunity vs. ab titer measurements, the "pandemic puppy", preventative care, and neonatal development; and so much more.
